

Project Title: Freddie Mercury Website

I'd like to build this website using multiple pages that sequentially lead to one another. As you click through the website, you can travel easily from one section to the next by just clicking an arrow. There is a ton of content about Mercury's career, early life, and hardships as well as a prolific amount of photography. I also would like to somehow incorporate Queen's music into the website.

- **About Page:** Why Freddie Mercury is important
- **Early and Personal Life**
 - Various complex relationships
 - Friendships and relationships with family and fellow bandmates
- **Mercury's career and Queen**
 - Top hits and musical genius
- **Battle with AIDs and Death**
 - Why this was so important and put in context of that time period
- **Legacy** - This can include a photo gallery and also be a good place to play Mercury's music
- **Bibliography and Sources**
